

Provides instant ethernet connectivity for text terminals

Extends the life of existing text terminals

More cost-effective versus PCs running text applications & terminal server solutions

Superior performance

INSTANT ETHERNET CONNECTIVITY

The ADDS Ethernet Adapter instantly converts ADDS text terminals, which typically connect via standard RS-232 cabling, into Ethernet-based terminals. With the ADDS Ethernet Adapter installed in an ADDS terminal, users can utilize an ADDS text terminal to access a single TELNET session over a TCP/IP network through a 10BaseT connection.

INVESTMENT PROTECTION

The Ethernet Adapter protects your investment in ADDS terminals when you migrate to a TCP/IP networking environment. Rather than discard your existing ADDS terminals, simply add the Ethernet Adapter and you're ready to communicate. The ADDS Ethernet Adapter is specifically designed to work with ADDS 4000, 4000/150, 4000/160, 4000/260, 4000/265, 4000/260lf and 4000/260lfc terminals.

COST EFFECTIVE SOLUTION

Many organizations provide their users who access text-based applications with PCs strictly because of their need to communicate with TCP/IP networks. With the use of an ADDS Ethernet Adapter, these users can access the

same text-based applications with an ADDS terminal at a lower per seat cost. In addition, the Ethernet Adapter allows you to connect an ADDS terminal directly to your TCP/IP network, eliminating the need for terminal servers and bulky serial cables.

SUPERIOR PERFORMANCE

Because your network is running at speeds up to 10 megabits per second, ADDS terminals equipped with ADDS Ethernet Adapters provide notable performance improvements versus terminals communicating over standard RS-232 speeds.

CONVENIENT PROCUREMENT

ADDS Ethernet Adapters can be factory installed at the time you initially purchase an ADDS terminal. Those who currently own ADDS terminals can have these terminals upgraded at any of Boundless Technologies' service depots, from an authorized Boundless options installer or on-site by a Boundless Technologies' field technician. See the back of this data sheet for additional details.

**BOUNDLESS TECHNOLOGIES'
ETHERNET INTERFACE ADAPTER
PROCUREMENT OPTIONS****FACTORY INSTALLATION UPON INITIAL PURCHASE:**

When purchasing an ADDS terminal, instruct your ADDS distributor or reseller to order the ADDS part number that incorporates the Ethernet Interface Adapter for the specific ADDS terminal you would like to purchase. Please contact Boundless Technologies if you need assistance in identifying a local ADDS distributor or reseller.

UPGRADES VIA RETURN TO DEPOT:

Those who currently own ADDS terminals can have Ethernet Interface Adapters installed at one of Boundless Technologies' Service Depots. Boundless Technologies has service depots conveniently located throughout the United States. To schedule an upgrade, call 1-800-231-5445. Typical lead-times for this service are within 5 days after receipt of the terminal.

UPGRADES VIA AUTHORIZED OPTIONS INSTALLER:

A select group of our distributors have been authorized to install options on Boundless Technologies products. For a complete listing of authorized option installers, please dial 1-800-231-5445, extension 7888. These option installers will work with you to arrange the return of your units to their facilities for upgrade.

PREMIUM ON-SITE INSTALLATION:

If you require expedited upgrade service, you can choose to have the upgrade performed by a Boundless Technologies technician at your location. If you select this option, you can obtain pricing and schedule this service by dialing 1-800-231-5445, and select the "spare parts, repairs, warranty assistance" option.

* Note: Prices and scheduling are based on the assumption that the units to be upgraded are in good working condition. If you would like to have units refurbished or repaired at the time of the upgrade, please inform our representatives at the time of scheduling and we will provide you with a quotation.
